Mr. Steve Parker
Senior Broadcast Analyst, Broadcast Analysis
Canadian Radio-television and Telecommunications Commission
Ottawa, Ontario
K1A 0N2

Dear Mr. Parker,

Re: Application 2003-1498-0

In a letter to you, we identified "Stuart Little, P.Eng." of Elder Engineering as a TVN Niagara Inc. (TVN) consultant. In fact, Stuart Hahn, P.Eng. is the engineer assisting Gordon Elder, P.Eng. in completing our "Technical Application" to Industry Canada.

TVN proposes using channel 22 to deliver TVN's primary analog transmission and to have Industry Canada allot another channel for TVN's future digital proposed usage.

TVN received the CRTC News Release of Feb. 3rd which describes Canada (including Ontario's) dramatic increase in TV advertising spending in 2003. (see attached exhibit)

TVN wishes to respectfully point out that the amount of revenue our proposal takes from the southern Ontario system is only but a small fraction of this increased Ontario TV spending, and that any negative economic impact TVN would have on the existing competitive Canadian Television Broadcast Licensees would therefore be negligible.

Yours truly,

A handwritten signature in cursive script that reads "Wendell Wilks".

Wendell Wilks
President and CEO
